Art Unit: 2154

1. This action is responsive to the application filed on January 14, 2000. Claims 1-20 are pending. Claims 1-20 represent a method, program and apparatus for a pet registration, search and retrieval.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Shorrock et al., U.S. Patent No. 6,283,065.

Shorrock teaches the invention as claimed including a animal collar that identifies a pet and allows a person to retrieve information on that pet from a database (see abstract).

As to claim 1, Shorrock teaches a method of locating lost pets comprising the steps of:

prompting pet owners to provide pet information relating to their pets and contact information for the pet owners, storing the pet information and the contact information in a computer-readable memory accessible by a host computer;(see figs. 1-19; col. 8; 13, Shorrock discloses that a pet owner can register pet information in a database);

storing the pet information and the contact information in a computer-readable memory accessible by a host computer; prompting a person who finds a lost pet to access the host computer via a communications network and to enter lost pet

Art Unit: 2154

information relating to the lost pet; comparing in the host computer the lost pet information entered by the person who found the pet to the pet information provided by the pet owners in an attempt to find a match; and if a match is found, providing the person who found the lost pet with the contact information for the owner of the lost pet (see figs. 1-19; col. 13, Shorrock discloses that after registering the pet collar, a person who found the pet could enter the collar information and retrieve owner contact information).

As to claim 2, Shorrock teaches the method as set forth in claim 1, wherein the pet information provided by the pet owners for each pet includes an assigned set of digits corresponding to the pet (see col. 7-9, Shorrock discloses that the pet collar is assigned a set of digits).

As to claim 3, Shorrock teaches the method as set forth in claim 2, wherein the assigned set of digits for each pet are printed on a tag that is worn by the pet (see col. 8).

As to claim 4, Shorrock teaches the method as set forth in claim 3, the lost pet information entered by the person who found the lost pet including the assigned set of digits on the tag (see col. 8).

As to claim 5, Shorrock teaches the method as set forth in claim 4, the assigned set of digits including a rabies tag number printed on a rabies tag (see col. 6, Shorrock discloses that the pet collar could be a rabies collar).

As to claim 6, Shorrock teaches the method as set forth in claim 1, the communications network including the Internet (see col. 6-8).

As to claim 7, Shorrock teaches the method as set forth in claim 1, the pet information being information selected from the group consisting of a veterinarian's name for the pet, the veterinarian's phone number, a licensing agency, a number from a rabies tag for the pet, a year that the pet was vaccinated, an indication of a pet type for the pet, an indication of a breed of the pet, a color of the pet, a date the pet was found, and a location where the pet was found (see col. 6-13).

As to claim 8, Shorrock teaches the method as set forth in claim 1, the contact information being information selected from the group consisting of the pet owner's

Art Unit: 2154

name, the pet owner's address, the pet owner's telephone number, a veterinarian for the pet, the veterinarian's address, and the veterinarian's phone number (see col. 6-13).

Claims 9-20 do not teach or define any new limitations above claims 1-8 and therefore are rejected for similar reasons.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Automated pet notice system by Adler, U.S. Patent No. 6,401,095.
- Lost pet notification system by Skelton et al., U.S. Patent No. 6,067,018.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Saleh Najjar whose telephone number is (703) 308-7613. The examiner can normally be reached on Monday-Friday from 6:30 to 3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, *Ario Etienne*, can be reached on (703) 308-7562. The fax phone number for this Group is (703) 308-9052.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-9600. The fax number for the After-Final correspondence/amendment is (703) 746-7238. The fax number for official correspondence/amendment is (703) 746-7239. The fax number for Non-official draft correspondence/amendment is (703) 746-7240.
